Certificate of Completion

This is to certify that **Muhammad Hamza, Muhammad Uzair, Muhammad Rayan** and **Muhammad Khubaib** have successfully completed their ACCP Semester I E-Project.

Submitted to: **Aptech Computer Education**

On

January 28th, 2023

Acknowledgement

First of all we would like to thank Almighty Allah for giving us strength and ability to complete this project.

And then, we would like to express my special thanks of gratitude to our teacher **Sir Ahmad Ali** guided us on the project *Kitchen Appliances*, which also helped us in doing a lot of new learning and we came to know about so many new things we are really thankful to him.

We are highly thankful to **Sir Ahmad Ali** for his guidance and constant supervision as well as for providing necessary information regarding the project & also for his support in completing the project.

Lastly, we would also like to thank our parents and friends who helped us a lot in finalizing this project within the limited time frame. We also express our sincere gratitude to E-Project team from Aptech Head Office, for their valuable guidance and support for the completion of this project. We earnestly hope that this project will provide all the necessary information required by the user to fulfill his/her inspiration. However, suggestion and Feedbacks for improvements will be thankfully welcomed & acknowledged.

Project Synopsis

The Nature Side is website that provides an online guardian for natural parks in Pakistan. You easily find knowledge about their history, tourism, and wildlife of parks. The main purpose to make this website is define how adorable and beautiful Pakistan is.

Problems Statement:

Web portal for National parks is a website which provides the people who are interested in visiting national parks and interested in wild animals can view this website to where they can get to know where the national park is situated and what all animals residing in that national park. The existing system uses manual operations for Maintaining information of the national park and animals residing of that particular park in paper and files which may be damaged due to external causes like fire, water etc. as a result it may lead to loss of information gathered permanently.

And each national park may require a new record to store the information about that park which may also lead to so many records were finding it in set of national park records may be too difficult. Existing system which was performed using manual operations overcomes by the proposed system called "National Parks" where viewing national parks and wild life in that particular park from anywhere in the world. You are supposed to create a website for them with the below mentioned requirement specifications. The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

Hardware and Software Requirements

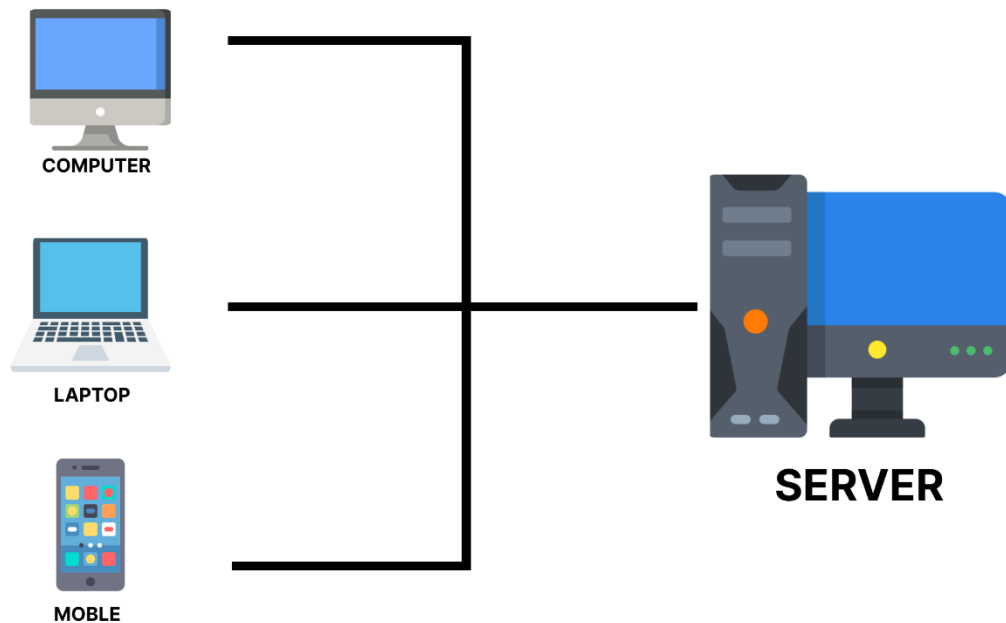

Hardware

- A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better
- 64 Megabytes of RAM or better

Software

- Notepad/HTML editor
- Dreamweaver
- IE 5.0/ Netscape 6.0

Architecture And Design of The System

Front End Technologies

- Html 5
- CSS
- Bootstrap
- Json

Enjoy Wonderful Day With Your Family

About National Parks of Pakistan

The oldest national park

Lal Suhanra in Bahawalpur District, established in 1972. It is also the only biosphere reserve of Pakistan. Lal Suhanra is the only national park established before the independence of the nation in August 1947. The main purpose of this area was to protect the wildlife of Cholistan Desert. A national park is an area set aside by a national government for the preservation of the natural environment. A national park may be set aside for public recreation and enjoyment or for its historical or scientific interest while keeping most landscapes and their accompanying plants and animals in their natural state.

Globally, there are around 6,555 national parks. Out of these 6,555 parks, 21 parks are situated in Pakistan. These national parks cover about 29,589 km² of the area which is roughly about 3 % of the total area (10,060,96 km²) of the country. The Kirthar National Park is situated in the Kirthar Mountains in Karachi and Jamshoro District in Sindh, Pakistan. It was founded in 1974 and stretches over 3,087 square kilometres (1,192 sq mi), making it the second largest national park in Pakistan after Hingol National Park. The uncontested heavyweight champion of the National Park System is Alaska's Wrangell-St. Elias National Park & Preserve. At 13.2 million acres, it's larger than Yellowstone National Park, Yosemite National Park, and Switzerland combined.

The Wild Life of Pakistan

What is Wildlife

Wildlife refers to undomesticated animal species, but has come to include all organisms that grow or live wild in an area without being introduced by humans. Wildlife was also synonymous to game: those birds and mammals that were hunted for sport. Wildlife can be found in all ecosystems.

Pakistan now has 398 protected areas, including 31 national parks, 92 animal sanctuaries, 97 game reserves, 19 wetlands reserves, and 160 community reserves.

Some of the mammal species include the caracal, Balochistan dormouse, Blanford's fox, dromedary camel, goitered gazelle, Indian crested porcupine, long-eared hedgehog, markhor, ratel, and striped hyena, bird species of bearded vulture, houbara bustard and merlin, reptile species of leopard gecko and saw-scaled viper. What animal is Pakistan famous for? The Official National (State) Animal of Pakistan. The markhor, a large species of wild goat with screw-shaped horns, is considered to be the national animal of Pakistan.

HISTORY OF NATURASIDE

NATURE SIDE was made by Steven Hocking in 1995. The main purpose to make this website is so people can easily find their favourite parks and get knowledge about their history, wildlife, and many other things. The Park History Program, begun in 1931, preserves and protects our nation's cultural and natural resources by conducting research on national parks, national historic landmarks, park planning and special history studies, oral histories, and interpretive and management plans.

ABOUT KIRTHA NATIONAL PARK

It wouldn't be wrong to state that every province in Pakistan is equally gifted with unmatched landscapes and natural beauty. Some of these destinations get immense tourist attention, such as the northern areas, while some wait their turn to be explored. Lacking account of such untouched and less explored destinations in the country, we cannot help but mention Kirthar National Park – a wildlife sanctuary in Sindh. Tourism in the country is booming, especially since a leading US Travel Magazine has declared Pakistan as the best tourist destination for 2020. So, we took this news as an opportunity to give our readers something new to discover. And, here we are with all the details you can use as a handy guide to visit and explore Kirthar National Park.

Whether it is about finding solace in the serene atmosphere of Gwathi hill station or going to the ancient city of Bhambore, Sindh, to travel back in time, both destinations rank equally in terms of seizing a backpacker's attention. Out of the many, mainly eight tourist destinations in the province of Kirthar National Park – where mountains cross paths with deserts, and green spaces are surrounded with several exotic animals and birds, founded in the year 1974, Kirthar National Park is the second-largest wildlife sanctuary in Pakistan. However, with gradual development in the area, the wildlife sanctuary in Sindh didn't get as much tourist attention from both national and international travelers as compared to other destinations in the country.

The Kirthar National Park is situated in the Kirthar Mountains in Jamshoro District in Sindh, Pakistan. It was established in 1974 and encompasses over 2,087 km² (1,152 sq mi), making it the third largest national park in Pakistan.

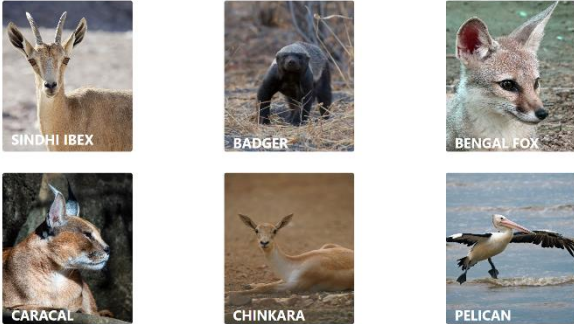

TOURIST ATTRACTIONS IN KIRTHAR NATIONAL PARK

THE WILD LIFE OF PARK

Indian foxes, jungle cats and jackals are still common. Substantial populations of urals (a type of wild sheep), Sindh ibex (also known as Turkmen wild goats) and chinkara gazelles live in the park. Indian grey mongooses, hedgehogs and porcupine are among the other larger species.

In 1984, a captive breeding programme for blackbuck was initiated, with the intent to reintroduce them into the wild. Fifteen of these antelopes were brought to one of the visitors' centres from the United States for this purpose.

ABOUT CHITRAL GOL NATIONAL PARK

Chitral Gol National Park is one of the National Parks of Pakistan. It is located in Chitral District in Khyber Pakhtunkhwa province of Pakistan beside the Chitral River, at a distance of two hours drive from Chitral town. The park is also known as Chitral National Park.

The Dargahkhail part of the park is where the former Melian's Summer Fort is located. At the time of existence of the Chitral State, the Melian and his family use to move here in the summer and hold court. The fort was constructed in such a way that it overlooked the entire city. It stands at an elevation of over 2800 meters above sea level. It is a 40 minute drive from the main Chitral city. The best season to visit: Dargahkhail is the month of May and June. Spring season starts here in those months and there will be a lot of greenery and flowers in those two months.

This park includes three valleys. Several glaciers also lie in the park through which several springs make their way and ultimately form a stream which runs 18 kilometers. The cold water of this stream flows towards the east into the River Chitral. The park is rich in trees particularly cedar trees. The park also serves to provide shelter for a vast bio-diversity, especially mammals, an endangered wild goat species. Some of the larger mammals found in the park include:
